

Short Volunteer Trip to Morocco May 2012

To assist the Smile Morocco Project

Dentaid have been fundraising for quite some time to support a very worthwhile project in Morocco offering free dental treatment to children in and around Casablanca.

Smile Morocco provides orthodontic care for 75 children with cleft lips or cleft palates each year. They also provide free basic dental care to between 30 and 45 Moroccan children every day.

However, the project needs **four Dentaid portable surgeries** in order to expand their services to children in more remote areas. With this new equipment the project hopes to be able to perform an additional 3000 treatments per year.

We are very excited to bring you an opportunity to be able to help Smile Morocco achieve this goal and also gain some hands on experience of overseas charitable dental work.

We are planning a short trip that will cost £1000 per person, including flights, transfers, hotel accommodation, food and also a contribution towards the project.

We will be working with our partners, Smile Morocco and will offer five days of free dental treatment to disadvantaged children. Not only will you be able to help with hands-on dental care, but the money you raise will also help pay for the dental equipment the project has needed for so long.

The proposed dates are 18th – 27th May 2012 and will include five days working at the project plus the option to spend some time exploring the area.

You will be required to pay a £300 deposit to secure your place. We will be able to assist you with fundraising the remaining £700.

The numbers are very limited, so do contact us as soon as possible to secure your place.
